TECH STACK SUMMARY

AWS | Azure | Terraform | Docker | ECS Fargate | GitHub Actions | CloudWatch | Prometheus | Grafana | Linux | DevSecOps | IaC | JavaScript | Java & React (basic)

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience designing, automating, and operating cloud infrastructure and CI/CD pipelines across AWS and Azure. Specialized in Infrastructure as Code (IaC), container orchestration, site reliability engineering (SRE), and end-to-end release automation for production-grade, high-availability systems. Microsoft Certified Azure Administrator (AZ-104) with a proven record of accelerating deployments, strengthening pipeline security, improving observability, and reducing infrastructure cost. Known for owning systems end-to-end, mentoring teammates, and collaborating across engineering, frontend, and backend teams to deliver reliable software at scale.

CORE COMPETENCIES

Cloud Platforms: AWS (EC2, ECS, Fargate, S3, RDS, ALB, VPC, SSM, CloudFront, Auto Scaling) · Azure (VM, VNet, NSG, VPN Gateway, Load Balancer, Blob Storage, Azure AD)

CI/CD & Release: GitHub Actions, YAML Pipelines, Rolling Deployments, Release Management, GitOps

Infrastructure as Code: Terraform (reusable modules, remote state)

Containers & Orchestration: Docker, Amazon ECS Fargate, AWS ECR

Monitoring & Observability: CloudWatch, CloudTrail, Prometheus, Grafana, SNS Alerting, SLO/SLA Tracking

Security & Reliability: OIDC Federation, IAM Roles & Policies, SSM Parameter Store, NSGs, VPN, DevSecOps, HA Design, Disaster Recovery, Cost Optimization

Languages & Scripting: Python, JavaScript, TypeScript, .NET, Tailwind CSS, Express.js

OS & Practices: Linux (Ubuntu), Windows Server, Git, GitHub, Agile/Scrum — Leadership: Mentoring, Incident Response, Cross-team Coordination

PROFESSIONAL EXPERIENCE

Software Engineer / DevOps Engineer — Rayna Group, Pune, MH

Mar 2025 – Present

- Built and maintained end-to-end CI/CD pipelines using GitHub Actions — builds, unit tests, Docker image pushes to AWS ECR, and rolling deployments on ECS Fargate — cutting release cycle time by 40%.
- Provisioned scalable AWS infrastructure (EC2, ECS Fargate, ALB, RDS, S3, VPC, Auto Scaling Groups) using reusable Terraform modules, eliminating manual provisioning errors and reducing costs across dev, staging, and production.
- Implemented OIDC-based IAM role federation and centralized secrets in SSM Parameter Store, achieving zero hardcoded credentials across all pipelines.
- Configured CloudWatch dashboards and SNS alerting for CPU, memory, and error-rate monitoring, reducing MTTD by 35% and improving service reliability.
- Authored auto-scaling policies tied to ALB traffic and CPU metrics, sustaining 3x traffic spikes with zero manual intervention.
- Containerized .NET and Node.js (Express) microservices with optimized multi-stage Docker builds, standardizing image sizes and improving cold-start performance across services.
- Managed Kafka-based event pipelines and SSM Parameter Store configuration for booking APIs, improving message reliability and simplifying environment-specific deployments.
- Led deployment standards and reviewed infrastructure changes, mentoring teammates on Terraform, containerization, and secure pipeline practices.

- Partnered with frontend and backend teams to streamline build and release of UI (React/Tailwind) and REST API services, reducing handoff friction across the SDLC.

Cloud Infrastructure Analyst — HCLTech, Noida, UP

Oct 2022 – Mar 2025

- Resolved P1/P2 cloud incidents across AWS and Azure — networking, security, and compute — maintaining average resolution under 45 minutes against high-availability SLAs.
- Automated Azure VM provisioning using ARM templates, Azure CLI, and Bash/PowerShell, cutting onboarding time from 2 days to under 2 hours and reducing configuration drift.
- Managed Azure networking (VNet peering, NSGs, VPN Gateways, Load Balancers, Blob Storage) across 10+ client environments, ensuring secure, low-latency cross-region connectivity.
- Maintained audit-trail compliance for infrastructure changes via Git-based version control, supporting change management and disaster recovery.
- Designed and operated scalable AWS architectures (EC2, ECS, CloudFront, S3, RDS) on Linux for multi-client production workloads at 99.9%+ uptime, improving cost efficiency through right-sizing.
- Created operational runbooks and documentation that standardized incident handling and accelerated new team member onboarding.

KEY PROJECTS

Automated CI/CD Delivery Platform on AWS — Rayna Group

- Designed a fully automated GitHub Actions pipeline: build, test, Dockerization, ECR image management, and rolling ECS Fargate releases — standardizing deployments across multiple services.
- Implemented OIDC-based authentication and SSM-managed secrets, eliminating all hardcoded credentials and hardening the delivery workflow.
- Outcome: 40% faster release cycles and a repeatable, low-error deployment process across all environments.

Terraform-Driven Infrastructure & Observability — Rayna Group

- Codified the full AWS footprint (EC2, ECS Fargate, ALB, RDS, S3, VPC, Auto Scaling) as reusable Terraform modules with remote state for consistent multi-environment provisioning.
- Built CloudWatch dashboards, SNS alerting, and traffic/CPU-based auto-scaling that sustained 3x spikes with zero manual intervention.
- Outcome: 35% reduction in MTTD and improved cost efficiency through right-sized, automated infrastructure.

Multi Cloud Operations — HCLTech

- Operated AWS and Azure environments, resolving P1/P2 incidents under a 45-minute average against high-availability SLAs.
- Automated Azure VM provisioning via ARM templates and Azure CLI; managed VNet, NSG, VPN Gateway, and Load Balancer networking across regions.
- Outcome: onboarding time reduced from 2 days to under 2 hours; 99.9%+ production uptime maintained.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) — ID: 62C565-951F9W | Nov 2024 – Nov 2026
- AWS Certified DevOps Engineer – Professional | AWS Training & Certification
- AWS Certified SysOps Administrator – Associate | AWS Training & Certification

EDUCATION

B.Tech in Computer Science — Maulana Azad National Urdu University, Hyderabad

CGPA: 8.3 | 2018 – 2022
